DETAILED ACTION

Status of the Application

Claims 58-116 are pending in the application.

Applicants' cancellation of claims 1-57 and addition of claims 58-104 in Paper No. 3, filed 09/21/01, is acknowledged.

Applicants' amendment to claim 69 and addition of claims 105-116 in Paper No. 8, filed 01/15/02, is acknowledged.

Lack of Unity

1. Lack of unity is required under 35 U.S.C. 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

- I. Claim(s) 58-68, 79-84, 87-97, and 105-115, drawn to a microbe expressing myo-inositol-1-phosphate synthase, a fermentation composition comprising a first microbe expressing myo-inositol-1-phosphate synthase and a second microbe inositol dehydrogenase, and a method for the production of 1,2,3,4-tetrahydroxybenzene using a first microbe expressing myo-inositol-1-phosphate synthase and a second microbe expressing inositol dehydrogenase.
- II. Claim(s) 70-77, 85, 86, and 98-104, drawn to a microbe co-expressing myo-inositol-1-phosphate synthase and inositol dehydrogenase, a fermentation composition comprising a microbe co-expressing myo-inositol-1-phosphate synthase and inositol dehydrogenase, and a method for the production of 1,2,3,4-tetrahydroxybenzene using a single microbe co-expressing myo-inositol-1-phosphate synthase and inositol dehydrogenase.
- III. Claim(s) 69 and 116, drawn to a method for the production of 1,2,3-trihydroxybenzene.
- IV. Claim(s) 78, drawn to a method for the production of 1,2,3-trihydroxybenzene.

Art Unit: 1652

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: The methods of Groups I-IV do not share any technical feature as the methods of Groups I-IV comprise different steps and utilize different products. Also, methods for the production of 1,2,3,4-tetrahydroxybenzene are known in the prior art (see, for example, page 15, lines 30-35 of the instant specification) and thus, Groups I and II share no special technical feature as defined by PCT Rule 13.2.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
